Chapter 1

Root issue HBASE-25274

1.1 Summary

Regionserver crash by YouAreDeadException

1.2 Description

Hbase cluster is enabled kerberos;

This problem occurs during cluster running, not during startup. So the Kerberos configuration should be fine

hmaster log:

1.4 Comments

1. **zhangduo:** You are dead means HMaster thinks the Region Server is already dead, usually this is because the znode for this Region Server is gone. The kerberos problem here is not the direct cause of YouAreDeadException. You need to find out whether the connection to ZooKeeper is still fine.
2. **zhou0145:** [~zhangduo] The crash is caused by the remoteCallFailed method, not by the loss of ZK Node
