Chapter 1

Root issue TIK A-404

1.1 Summary

Media-type handling depends on the locale

1.2 Description

As reported by Elif T. Kus on tika-user@, the media type handling code in Tika is locale-dependant. The MediaType class uses the String.toLowerCase() to normalize media type names, which is a good idea in general since types are supposed to be case insensitive, but unfortunately the toLowerCase() method returns different results based on the default locale of the platform.

1.3 Commits

1. Commit **9d31098** by **Jukka Zitting** (2010-04-28): TIK A-404: Media-type handling depends on the locale

Also media type parameters should be handled case-insensitively

git-svn-id: <https://svn.apache.org/repos/asf/lucene/tika/trunk@938884> 13f79535-47bb-0310-9956-ffa450edef68

2. Commit **a918dd6** by **Jukka Zitting** (2010-04-12): TIK A-404: Media-type handling depends on the locale

Additional fixes as suggested by Elif T. Kus.
