Chapter 1

Root issue TAJO-2167

1.1 Summary

Invalid join result when the join predicate contains a function

1.2 Description

When a join predicate contains a function, the evaluation result of the join predicate is invalid like below.

```
tpch> select char_length(l_shipdate) from lineitem;
?char_length
-------------------------------
10
10
10
...

tpch> select char_length(o_orderdate) from orders;
?char_length
-------------------------------
10
10
10
...

tpch> select l_linenumber from lineitem, orders where char_length(l_shipdate)
+ 1 = char_length(o_orderdate) + 1;
l_linenumber
-------------------------------
```
